

Equipped with a flexible arm, the new H750 allows a wide choice of orientations. Designed for daily purposes, this lamp can now be fixed on wall, table bracket or on a rolling stand. With its integrated On/Off Switch and the 20W dichroic halogen bulb, the reflector produces a cold and shadowless light.

Most common applications :

- Dermatology
- Trachéotomie
- Ophthalmology
- Minor surgical interventions
- Dental examination
- Intensive care units

Reduced size powerful lighting

Electronic transformer integrated in the arm

Wall bracket

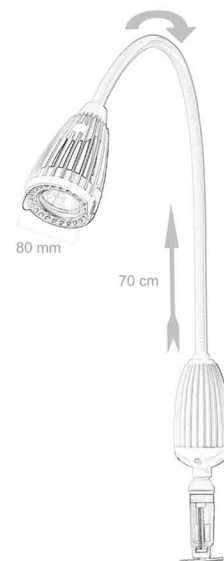

Table bracket

Rolling stand with 5 castors

Technical datas

Light source :	dichroic halogen bulb 12V/20W
Colour temperature :	3200 ° Kelvin
Light intensity :	26 000 lux at 50 cm, 6 500 lux at 100 cm
Dimension and weight :	wall/table bracket: 3 kg - rolling stand: 10 kg
Range :	700 mm
Equipment :	transformer and On/Off Switch
Power supply :	220-240V/50-60HZ
Bulb life :	4000 heures
Covering :	PVC
Standard and electrical type:	class I, type B

CE EN 60-601-1: security for medical devices
 EN 60-601-1-2: electromagnétique compatibility of electrical medical devices
 complies with the European standards of EEC 93/42 directive
